M. D. Crown Holds Meeting

The Council of the above District met in the Municipal Office, there being present Councilors Armstrong, Huoppehauer, Parker, Hand, Hall, Stewart.

Returning Officer Gibson took charge of the meeting and called for Nominations for Reeve.

Hall: That Geo. Hand be Reeve.

Hand: Huoppehauer for.

Stewart: That Huoppehauer be Reeve.

Parker, Armstrong, Stewart and Hand for.

Huoppehauer was then declared Reeve for the ensuing year.

Parker: That Hand be Deputy Reeve for the ensuing six months.

Hall: That nominations close.

Hand was then declared Deputy Reeve for the ensuing six months.

The Secretary then took charge of the meeting and read the minutes of the previous meeting. It was moved by Hand that they be adopted as read.

Parker: That Mr. Armstrong be delegate to Hall Board Convention.

Parker: That Reeve and Secretary be empowered to look into the Ewart case.

Stewart: That Parker be Chairman of the Health Board and delegate to the Full Time Health Unit.

Hand: That Councilors fee for meetings be \$4.00 per day.

Armstrong: That Auditor's salary be \$200.00 for 1933.

Hall: That the following scale of wages for road work in 1933 be passed:

Man, 25c. per hour.

1 horse, 6 1/2 cents per hour.

Foreman, 35 cents per hour.

15.27 tractor, \$1.75 per hour.

Hall: That this Council accept the Secretary's offer as to the cut in his salary, making it \$2400.00; lost.

Parker: That Hall's motion be amended to read: That Secretary's salary be cut 10 per cent, on the full amount of \$2500.00 and to take effect May 1st, 1933; lost.

Stewart: That the Secretary's offer of \$2500.00 for 1933 be accepted.

Hall: That the minutes of the meeting June 27, 1932 be republished in an early issue of the Lacombe Globe.

Armstrong: That Nels Pearson be paid \$15.00 for rent of road through N.E. 30-40-26-4.

Hall: That Council purchase one 8-foot loam, wheel Maintainer with a 2-foot extension blade, to be used in Division 5 in 1933.

Hall: That the N.E. 27-41-26-4 be leased to W. J. Taylor for 1933 for the sum of \$35.00.

Hall: That the Director of Surveys be authorized to have portions of the old road plans affecting the N.E. 18 and S 1/2 19-39-26-4 and S.E. 24-39-27-4, cancelled when the plan of the new survey is registered.

Stewart: That the road allowance on south side of Sec. 11-41-27-4 be cancelled.

Hand: That our regular meeting be held the second Friday in the month.

Hall: That all cheques of the Municipal District of Crown No. 309 be drawn in the name of the said Municipal District and signed by the Reeve (O. W. Huoppehauer) or when he is not procurable by the Deputy Reeve (Geo. Hand) and by the Secretary-Treasurer (E. Walker Simpson) of the Municipal District of Crown No. 309.

Hand: That we give the Salvation Army the usual Grant of \$100.00 for Social Service purposes.

Parker: That the Secretary be instructed to write to the Dept. of Public Works for an itemized statement on the gravel road west of Lacombe.

Hand: That Divisions one and four get a 2-foot extension for their 8 ft. grader.

Parker: That the offer of \$75.00 of the Lacombe Hospital be accepted re Johnston.

Armstrong: That R. Jones be paid for road revision on S.W. 10-39-26-4 at \$25.00 per acre for 1.90 acres.

Parker: That By-law No. 80, being for the borrowing of \$22,000.00 for School purposes be given a first reading.

Parker: That By-law No. 80 be given a second reading.

Hall: That By-law No. 80 be given a third reading and passed.

Armstrong: That the report of the Returning Officer be accepted as read.

Hand: That the accounts be passed and ordered paid:

Farmer Chiefs Want Rebate

Calgary—Provincial government urged by the executive of the United Farmers of Alberta to pay a rebate to all those motorists who had their license fees paid at the old rate during the first three months of the year. This was decided at a meeting of the executive held during the past two days in the central office. The meeting was attended by all members of the executive with the exception of the president, Robert Gardiner, M.P., who is still in Ottawa. Reports were that Mr. Gardiner's health had improved substantially.

Mrs. Price, president of the U.F.A., admitted a resolution from that body which was endorsed unanimously. It voiced emphatic protest over the Rhodes budget, especially the imposition of two cents a pound excise tax on sugar. Under present conditions and reduced standards of living the imposition was not only an additional burden, but an actual menace to health, it was maintained.

Reports from all sections of the province indicated that membership up to the end of March was double those at the end of March last year, as a result of the membership drive being conducted.

Following reasons for the increase were given: 1. Reduction in the fee. 2. A new sense of security and confidence in the U.F.A. created by the change in the Debt Adjustment Act. 3. Interest as a result of the association's affiliation with the Co-operative Commonwealth Association. 4. Extension of co-operative buying activities.

A resolution of congratulations was forwarded to Hon. C. L. McPherson, Minister of public works, on "The vindication of himself and of members of his department in the recent highways probe."

At the Avalon

"If I Had a Million," fifteen-star drama which is regarded as the most ambitious undertaking ever to come out of Hollywood, plays at the Avalon theatre this week-end.

Gary Cooper, George Raft, Wynne Gibson, Charles Laughton, Jack Oakie, Frances Dee, Charlie Ruggles, Allison Skipworth, W. C. Fields, Mary Boland, Roscoe Karns, May Robson, Gene Raymond, Lucien Littlefield and Richard Dix distribute his, the largest group ever assembled for a single picture, play the leading roles in "If I Had a Million."

Comedy, tragedy, irony, romance are combined in the story, which centers around Bennett, an eccentric millionaire who distributes his fortune among nine persons whose names he has chosen at random from a city directory.

Short, Charlie Murray in "Court-ing Trouble."

Comed. "Farewell To Arms."

"Evenings For Sale" May 4, 5 & 6.

Show starts Thursday and Friday at 8:30; Saturday 7:30 and 9:10.

WOULD SHUT UP GOVERNMENT HOUSE

Calgary, April 17—Closing of Government House at Edmonton official residence of the lieutenant-governor of Alberta was urged in a resolution passed by the executive of the United Farmers of Alberta.

The executive, during the weekend, pointed out in the resolution that the resolution that curtailed aid to the University of Alberta would bring about increased fees and prevent many from obtaining a higher education. Reduction of grants to country school fairs would also be injurious, the resolution stated.

NEGOTIATING FOR FIVE CENT POOL PAYMENT

With reference to a statement made in the House of Commons at Ottawa concerning a 5 cent bushel payment on wheat pooled in the 1929-30 pool, R. D. Purdy, manager of the Alberta Wheat Pool has issued the following statement to elevator agents:

"Negotiations have been under way for some days by our Pool organizations with the leading banks and the federal government for the necessary approval of a distribution of this nature, but details involved in final approval are still to be completed and we are not in a position to make a definite statement as to when the proposed distribution will be available on deliveries to the 1932 pool. We would ask you to assure interested pool members that we are doing our utmost to arrange for a distribution at an early date as possible."

I.O.D.E. CARD PARTY

The I.O.D.E. will hold a bridge party in the Empress Hotel on Friday evening. A good time is promised everyone who attends. Admission 25c.

Lacombe's Big Sports Event

With just a week to go, the fighters listed on the big programme are almost through their training and are certainly in rare form. Enthusiasm over the big event is being manifested in the large number of tickets being sold. The big posters are out, and are proclaiming to fight fans far and wide the big festive treat in store for them. At the training camp here crowds are attending the work-out daily, and take our word for it, they are all excited over the big affair. Bob Parker's new garage on Nanton Street will be the scene of the tournament, and carpenters are now at work preparing the new garage (formerly the Cornet Theatre) for the big fight. All fans will be sure of the utmost comfort and no matter where the seat is located he will be able to see the ring to good advantage.

The referee will be W. Wells, of Red Deer, who is a veteran at refereeing, and fans can be sure of an absolutely fair and impartial decision. The judges will be Inspector McLean, of Red Deer and Constable Ball, of Innisfail.

Following is a complete list of the draws:

Main Bout

O'Brien vs. Boehle

Grand Prairie vs. Endang

Both light heavyweight and very evenly matched. Both fighters have fought here before and are fast men.

Scoti McPherson vs. Young Shanks

Lacombe vs. Athabasca

This 8 round bout is for the championship welterweight title of Alberta. Both men are top notchers.

Preliminary

Don Wells vs. Babe McRain

Red Deer vs. Athabasca

6 rounds for the Featherweight Championship of Alberta.

Baden Whitesides vs. Kid Aleide

Innisfail vs. Athabasca

Both these fighters are well known to fight fans of Alberta. This will be a really good 4-round bout.

John Wilkinson vs. Gene Welsch

Alix vs. Erskine

4 rounds of good fighting. Both men are in great condition and should put up a real battle.

Scotty McPherson vs. Young Shanks

Lacombe vs. Athabasca

This should be a nice 4-round match. Scotty is well known here and is in perfect condition. Shanks has a good reputation up north. This will be an interesting battle.

Young Firpo vs. Kid Chocolate

Lacombe vs. Chicago

These two 95 pound fighters should put up a nice, speedy battle.

Backstage seats \$1.25. Box Seats, \$1.00.

Tickets are now on sale at Park's Garage, Lacombe; Tommy's Cafe, Lacombe; Gordon McKelvey, Ponoka; Martin's Grocery, Stettler; Guy Short, Empress Hotel, Lacombe; Robbin's Barber Shop, Red Deer; Park's New Garage on Nanton St.

Wheat Outlook

Drouth on the plains of Kansas, Nebraska, Oklahoma and Texas has checked the growth and hindered the crop prospects of many millions of acres winter wheat planted in that area. Now governmental authorities in the United States predict the smallest wheat crop for years.

The direct result has been booming wheat markets and rising prices in that country.

The four states mentioned constitute the "bread market" of the republic. Ordinarily the four states produce about one-third of the total wheat harvested in the States. They comprise the "surplus producing" states as any exports emanate from there. They also produce the best quality of United States wheat, outside a small amount of hard spring wheat raised in states fringing on the Canadian prairie provinces. Kansas is the largest producing state in the Union and her "red winters" are well-known in the international wheat trade.

The misfortune of the wheat farmers in the winter wheat area of the continent will go a long way toward solving the problem of top-heavy surplus. It is too bad, of course for the unfortunate farmers in that territory, and we on the Canadian prairies can sympathize with them from a keen understanding of what crop failures mean. At the same time a big winter wheat crop would have plunged the wheat market into further confusion.

The wheat buying countries have been following a sedate course for several years, buying wheat whenever they chose to do so and at almost any price they offered. They did not find themselves in an entirely different position in another year or two. Should any serious misfortune happen the crop of one country this year, the world might find it was not very far from a real scarcity.

Three Die in Prairie Fire

Drumheller, April 14th—Two are dead, another is lying in hospital, four farms have been destroyed and a section of from 15 to 20 miles square laid waste, as a result of a prairie fire north of Drumheller today.

The dead are:

Margaret Devalerio, aged 16 years.

Ellen Devalerio, aged 11.

Their mother suffered grave burns and their father escaped with minor injuries.

The family of four was caught in the path of the prairie fire when their car stuck in a mud hole. The two girls, who were away from the high grass. When the fire had passed over, the farmer found them dead. Friday evening the fire was quenched, after hundreds of people from the district had fought since noon.

New Regulation For School Land Leases in Effect

During the past year and a half many holders of school land sales contracts with the provincial department of lands have voluntarily relinquished their contracts, and have entered into lease arrangements covering a period of six years. These arrangements, made in anticipation of better conditions than at present exist, have proved and are likely to prove in the immediate future, too onerous for the lessees in view of the depressed state of affairs.

In order to give some relief to the situation, holders of these leases will be given opportunity to obtain cultivation permits, paying to the department of lands a cash rental of four cents an acre for all portions of the land they do not cultivate. They will also pay a permit fee of \$1.00 and a share of crop grown on the land during 1933. The share of the crop paid in any one case will not be greater than one-quarter of the crop, scaling down to one-seventh.

Settlers who make such arrangements with the department and comply with the terms of their permits, will have priority right for a renewal for 1934, and at the expiration of that season the settlers will have the first right to lease the land under the regulations of the department.

These leases are for a term of six years, renewable for a further six years, so that under these arrangements, a settler may have possession of the land for 14 years if he complies with the requirements.

In the case of land leased from the department for payment of taxes and on the cultivated area, up to the amount of the department's share of the crop grown on the land, provided the lessee pays the taxes assessed against the land and furnishes a receipt for the payment. Responsibility for payment of taxes and of taxes in any year on leased land is an obligation entirely upon the lessee.

An amendment to the lands act passed at the recent session of the legislature, gives authority to the minister of lands to consolidate sales of school lands so that any sum paid under an agreement of sale, exclusive of interest, may be used in liquidate the principal monies due under the contract covering land which the owner desires to retain.

MURDERER OF WIFE AND BABY GETS LIFE

Walkerton, Ont., April 14—Melville Wilkie, 24-year-old Owen Sound Transport driver, tonight was committed to an insane asylum for the murder last December of his wife in a gasoline blaze that burned their bedroom and suffocated their baby.

Wilkie, accused of setting fire to the home so he might collect an insurance policy he had placed on his wife's life, was convicted of the murder in the court of Mr. Nicol Jeffrey.

The jury returned its verdict after the trial had lasted for three days. On the night of Dec. 5, or early the following morning, fire swept suddenly through the bedroom in the Wilkie home at Owen Sound, Mrs. Wilkie suffered fatal burns, dying 17 hours later. The six-month-old daughter of the Wilkies was suffocated in the room.

STRANGE CULT ENDS FUNCTION REAL TORTURE

Denver, Colo., April 17—The holy zeal of the members of the "The Church of Jesus Christ of Latter-day Saints" in blood on jagged rocks in the wilderness of southern Colorado and northern New Mexico Sunday as their ceremonies were climaxed.

As Easter's sun struck glory to the towering Sangre de Cristo to the Rocky mountains, this strange cult

To Carry on School Fair

At a meeting of the Lacombe School Fair Association, held on Saturday, April 16th, a resolution was passed to carry on with the School Fair this Fall. The meeting was called after receipt of a letter from the Department announcing that no Fair grant would be forthcoming this year. Each of the twelve school districts concerned are to be asked to make up the extra \$15.00 required to meet this loss of the grant. In the event of this failing, it will be necessary to scale down fair prizes to meet expenses. The question of the Oratorical contest was left in abeyance for the present, until it could be ascertained whether the required number of schools will enter the contest.

INTERESTING ADDRESS

Mrs. Cascaden, Red Deer, Prov. Secretary of Young People's work, proved to be a delightful speaker, and brought some very interesting stories from the Dominion Mission Board, in her address before members of the W.M.S. and Y.W.A. on Tuesday evening, on the occasion of the annual Easter Thankoffering. Beautiful vocal solos were given by Mrs. J. MacDonald and Mrs. G. P. Johnston, and a reading by Kathleen Hay was also much appreciated. Offering received amounted to: W.M.S., \$20.40; Y.W.A., \$10.45; M.B. 70c; Associated Societies \$3.25.

MARRIED

SMITH-BABCOCK

At 7:45 on the evening of Saturday, April 15th, St. Cyprian's Church, Lacombe was the scene of the marriage of Eleanor Louise, daughter of Mr. and Mrs. W. H. Babcock, of Lacombe, and George Leonard Cecil on 27 Mr. and Mrs. William J. Smith, also of Lacombe.

The witnesses were Mr. and Mrs. Peter Anderson.

The happy couple have the best of good wishes from a very large circle of friends.

It is understood that they will reside in Red Deer where Mr. Smith is engaged in business.

THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary

St. Cyprian's Church Lacombe

Rector: The Rev. T. H. Chapman

Organist: Miss Kathleen C. Walters, L.A.B.

April 23rd, 1st Sunday after Easter 10:30 a.m. Sunday School.

11:00 a.m. Morning Prayer.

7:30 p.m. Evening Prayer.

The Bishop is expected to be here for the purpose of administering the Sacramental Rite of Confirmation or "Laying on of Hands" at 11 a.m. on Sunday, June 11th, (Trinity Sunday). There are about 75 persons in this Parish Who Should Offer Themselves as Candidates for Confirmation. Are You One of Them? Classes of instruction are being held at the Church every Sunday afternoon, and several have already definitely decided to be Confirmed. If you live at an inconvenient distance from the Church you could arrange to do your preparing at home.

On Wednesday, May 3rd, the Alix Players will present at the Avalon Theatre, Lacombe: "Sweet Lavender," a three-act comedy with a cast of 10 characters. Full particulars in next week's issue. Reserve this date.

Blackfalds News

At a special meeting of the ratepayers of the Blackfalds School District held last Saturday afternoon, Mr. P. McLennan was elected Trustee to fill the vacancy caused by the resignation of Mr. Lee Jones from the Board.

A meeting was held for re-organizing the Cemetery Association. Mr. Matthias was appointed chairman, Mr. Jas. Miller, Secretary-Treasurer and Messrs. Phillips and Waghorn as additional members of the Board.

Rev. H. D. Riggs along with other pastors autted to Calgary to attend the meetings of the Oxford Group on Thursday and Friday. Mr. Riggs will report on the working of the Group at the Services on Sunday next, at Spruceville at 11 a.m. and at Blackfalds at 7:30 p.m.

Beginning next Sunday, April 23rd, the preaching service will be held at 11 o'clock sharp and the Sunday School will begin at 11:45 in the Spruceville Hall. Note the change of time of meeting for both the Sunday School and Church Service.

There will be a program and supper held in the Iowa Hall on Thursday evening, April 27th. Admission adults 25c; children 15c. Everyone come.

It hasn't been found yet. See the new low priced Beatty Pump at Morrison and Johnston, Ltd.

WORLD HAPPENINGS BRIEFLY TOLD

The famous international horse show in London, has been abandoned for this year.

A record, probably without parallel in the Dominion, is one held by Quip, Ontario, where not a single mortal fatality occurred within the city limits during 1932.

Employing 45 men, camp No. 3, owned by P. Bala, logging operator of Dewdney, B.C., has re-opened. The mill and camp, closed since November, will cut for export.

Alexander Sangster, who once homesteaded a quarter section of land, in what is now the heart of Winnipeg, is dead at New Westminster, B.C., aged 80.

W. A. Crawford-Ross of Nanton, Alberta, was re-elected president of the Alberta Breeders' Association at the annual meeting in association at the annual meeting at Calgary.

Major W. H. Gladstone Murray, M.C., prominent official of the British Broadcasting Company, has arrived in Ottawa to begin his temporary duties as advisor to the Canadian Radio Broadcasting Commission.

Construction of a \$75,000 oil refinery in Calgary is planned by Federated Oil Consumers, Ltd., Harold J. Maloney, chairman of the company's board of trustees states. The plant's capacity would be 250 barrels a day.

Alberta's legislature has adopted a motion presented by Premier J. E. Brownlee, urging the Dominion Government to call as soon as possible a conference to discuss changes in the British North American Act.

England will probably not be represented at the Canadian Biscuit on Connaught ranges, Ottawa, this August. Lord Cottesloe, president of the National Rifle Association, was "afraid financial conditions would prevent" the sending of an English team.

For Economic Union

Head of Radio Corporation of America Urges Removal of Trade Barriers

General James G. Harbord, head of the Radio Corporation of America, in an address at Dallas, Texas, urged early formation of an economic union in the western hemisphere to remove tariff and trade barriers, insure international peace and abrogate political frontiers.

Speaking before a joint session of the Pan-American Medical Association Congress and the Pan-American League, Harbord predicted nations of both Americas will tend to be driven into such a union because of last year's Ottawa conference, at which seven British commonwealths revoked trade favors previously granted other nations.

He declared the practical effect of the Ottawa conference and of other world affairs will provide a stimulus for action toward Pan-American union, when American nations hold their seventh international conference at Montevideo next December.

"The Ottawa conference has shown that, if tariff walls are to stand they must embrace a wide area, such as the British Empire, within which there can be free trade. In principle, the Ottawa agreement is much the same as that whereby there is free trade within the 48 united states."

Justifying formation of a western league and an economic break with the old world, the general said: "With all the sentiment that should bind us to the regions of our racial origins, there is no reason to the past in seeking to live our own lives in the freedom of the west."

Game Birds For Saskatchewan

Fifteen Hundred Pheasants Are Sent By North Dakota Government

Saskatchewan's wild bird life population was increased by 1,500 pheasants when several carloads of this beautiful game bird arrived from North Dakota.

The pheasants were sent to the game branch of the Saskatchewan government in exchange for pickled eggs shipped from Jack Fish Lake to the North Dakota government.

The birds will be distributed widely throughout the province, stated Major John Barnett, deputy minister of natural resources, while 400 or 500 will be retained at the wild animal park at Moose Jaw. The birds at Moose Jaw will form the nucleus of a hatchery from which eggs will be distributed to all parts of the province.

Almost An Englishman

Napoleon narrowly missed being born an Englishman. England and France had been wrangling about possession of Corsica for several years, and it was just a few months before Napoleon's birth, in 1769, that the controversy was settled in favor of France.

Sassafras trees have three distinct leaf forms and all three may often be found on the same twig.

India fears an extensive revolt against taxes.

Statement Is Denied

Stefansson Says Eyes Do Not Change Color During Arctic Night

Brown eyes do not turn blue during the long nights of the polar region, according to Dr. Vilhjalmur Stefansson, noted Arctic explorer. Science Service quoted him as refuting, in a communication to the editor of Science, the statement made in another magazine that "after a prolonged absence of sunlight, men on polar expedition find that their eyes, irrespective of previous color, have turned blue."

Dr. Stefansson, in all his long experience in the lands of long nights could not recall having observed this phenomenon. The statement was alleged to have been inspired by an entry in the journal of Captain Scott, British explorer who perished after having reached the South Pole. Inquiries addressed to Captain Scott's companions and collaborators not only failed to bring confirmation of this report but brought forth statements to the opposite effect. Dark-eyed men see the sun return at the end of a polar night with eyes that are still dark.

Expensive Economy

Skimping On Advertising Has Always Always Been Poor Business

Henry C. Lytton, a veteran Chicago merchant, is quoted as observing that 1933 is of all years a year in which business men should make full use of advertising. And he speaks of what he knows.

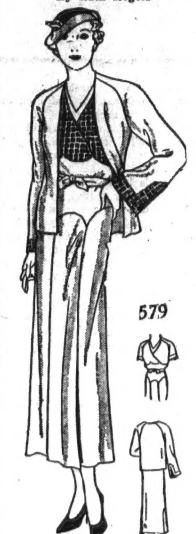

Forty six years ago Mr. Lytton launched his business. He had, as he points out, just \$12,000 capital, but he did not hesitate to spend between \$3,000 and \$4,000 of it on newspaper advertising before he even opened his doors.

His business recently was valued at approximately \$7,000,000. As a testimony to the work that a wise advertising program can do for a business his experience speaks volumes. Skimping on the advertising appropriation can be false economy of the most expensive kind.

SMART! ISN'T IT WITH MANY POINTS TO AID THE HEAVIER FIGURE

You won't go wrong to choose this jacket dress for your Spring wardrobe.

It is a Paris favorite. The jacket has the most interesting sleeve treatment. It is the joyful "boxy" type.

And isn't the dress just adorable? The cross-over bodice is slenderizing. And it has a trim waist vest. The paneled skirt will make you appear tall and slender. The scalloped seaming has the effect of diminishing hip bulk.

The original model was the prettiest rosy-beige sheer rough woolen, with beige and brown checked woolen. The vest was white pique. It's an opportunity to have a stunning wearable suit at a minimum cost.

Style No. 579 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust.

Size 36 requires 4 1/2 yards 39-inch, with 1 1/2 yards 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Merits Of Farm Life

Where Industry and Thrift Will At Least Provide An Honest Living

Grace Luckhart, writing in The Vancouver Province, says: "Every time I write anything on the subject of getting back to the land for a living I rouse a lot of antagonism among the jobless. They write and tell me to try it myself for a change. I have tried it. I was brought up in a self-respecting way on a farm, a poor farm at that, and so I mean to stick to it. The year round, a farm where there was never any money, but plenty of food, a few clothes and self respect and the peace that goes with it."

"Now, of course, people bring up the argument that times have changed. Certainly they changed, people didn't need the land for a while, but if you will notice times have changed back again. Now the people will have to change too."

"I remember my father's first consideration was to have a year's supply of four ahead, partly because of the security there was in its possession, and partly because my mother claimed it was impossible to make bread with new flour. In those days we grew enough flat wheat to produce our own flour. Then, too, we were about the last of the old-fashioned farmers who had a few sheep and managed to have sufficient wool to exchange for several bolts of good husky red flannel for the men's shirts and everybody's dresses. I thought it a frightful hardship to have to wear flannel dresses, but it meant the family was clothed and clothed warmly at that."

"The butter and eggs had to be put away for winter use—to say nothing of the supply that was taken to the store and traded in for groceries or anything else we needed. No farmer's wife who was worth her salt would run a bill in those days. She kept the table from the sale of her butter and eggs. And they didn't bring such a fabulous price either. I have tasted a good many dozen of eggs up the dusty road to the store at Sharon and received 10 cents a dozen in trade."

Halifax Had Freak Winter

Lowest Temperature Recorded Was Seven Degrees Above Zero

Yachting on the harbor was not the only unusual incident of this freak winter in Halifax. For the first time since weather records were first begun in the city, about 60 years ago, the mercury failed to drop to zero during the months of December, January and February.

Mean temperature during February was 29.3 degrees, or nearly six degrees higher than the mean mark of 23.69 established during the last 29 years, according to figures compiled by Frederick R. Ronnan Dominion meteorologist here.

The coldest day of the winter was Feb. 11, when the temperature was seven degrees above zero.

Absence of snow was another unusual feature of the winter. For instance, the total of snow and rain combined in February was 5.31 inches. During the same month last year the total was 17 inches.

Broadcasting Not New

Had Its Origin In Halifax Over Thirty Years Ago

If you think broadcasting is something new, read this from the Halifax Herald: "Broadcasting, considered new within the last few years, had its origin in Halifax more than 30 years ago, when the unusual experiment was made in the old academy of music. The Baker Opera Company was playing there. Creighton Mitchell, now of Wolfville, then an employee of the Nova Scotia Telephone Company, rigged a large funnel over the stage, placed a telephone microphone in the mouth of the funnel, and carried the program over telephone wires to the telephone company's building, where it was enjoyed by all the staff."

Japan Buys Canadian Nickel

To Be Used In Mining New Small Coinage

The finance ministry recently bought from the International Nickel Company of Canada several hundred tons of nickel for the purpose of minting new small coinage to replace the present five and ten-cent pieces of nickel and copper alloy. The silver is 1-100 of the yen, which is equivalent to about 22 cents.

Officials of the finance and war ministries denied any knowledge of a plan to convert the present coins into bullets.

Seeds From Many Countries

Vegetable seeds for Canadian gardens are brought from many different countries. Four tons of spinach seed came from Holland last year to a Toronto seed house. Lettuce, beet and carrot seed comes mostly from California. Denmark supplies cabbage and cauliflower seed.

BRITAIN'S ARSENT-MINDED PASSENGERS

They are being fed by the contribution of a group of women who donate 1 cent a meal to the cause, it was disclosed the other day. Organized three months ago, the emergency food brigade has been functioning quickly and today its novel plan is providing \$1,500 a month for the needy. Each of the 1,150 members has a box into which the pennies are dropped at every meal. On the first of the month, they are collected by brigade officers.

Would Be Welcomed

"Down with tipping!" is to be the slogan of an association of writers, artists and publishers being formed in Paris. The object of the association is to enforce the abolition of tips in all circumstances and to replace them by salaries paid by the employer or by percentages on the money taken by the employees.

Left Large Estate

Field Marshal Sir William Robertson, who died Feb. 12, left an estate of £49,000, about \$200,000 at present rate of exchange. Noted in the list of bequests were gifts of all his awards and medals and decorations to his son for life. On his son's death these are to follow the baronetcy.

An Amazing Device

Marvelous apparatus has been devised by Mr. Joseph Gattorbur, co-proprietor with an eye-doctor of Vienna, by which a person completely blindfolded can read a newspaper three feet away. Sight is produced by electric energy stimulating the optic nerve.

Grain shipped through the port of Montreal in 1932 amounted to 112,883,703 bushels.

Makes Dramatic Story

American Money Helped King Of Greece To Escape

King-George of Greece has the upright carriage, the high, bold forehead, and the unaffected bearing of his father, the late King Constantine. Although not well off, he probably prefers his present mode of life to the disturbed existence which ended in his banishment nearly 11 years ago.

He reigned for only 18 months, and during that time tension between Greece and Italy was at its height. It was broken by Mussolini's famous bombardment of Corfu, which resulted in the proclamation of a republic. How the King and Queen escaped from the royal palace on that occasion makes a dramatic story. Some months previously Mrs. Gary, wife of Judge Gary, the American millionaire, was entertained by the Queen in the hot season, and was surprised to find the palace swarming with flies. She promised to send the Queen some anti-fly curtains from America, but found it difficult to get them through, so she sent a cheque for 5,000 dollars instead, so that the curtains could be bought in Europe. The money arrived the day before the revolution, and it was only by its aid that the King and Queen were able to bribe their way out of the country.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE JUNKET WITH CHOPPED NUTS AND WHIPPED CREAM

4 tablespoons powder for orange junket.

1 pint milk.

1/2 cup whipping cream.

1/4 cup sugar.

Chopped walnuts.

Green maraschino cherries.

Make chocolate junket according to directions on package. Chill in refrigerator. When ready to serve, whip cream and add sugar, mixing well. Place on dishes of junket, and sprinkle chopped nuts over it. A green maraschino cherry adds color to the topping.

CAROLINE FRITTERS

To three-fourths cup canned corn, add one-half cup milk, two well-beaten eggs, and one-half tablespoon sugar. Mix thoroughly. Mix one scant cup flour, one tablespoon baking powder and one-half teaspoon salt. Sift and combine with the other mixture. Place buttered muffin rings in a buttered dripping pan. Drop the combined mixtures into the rings, and bake in a moderate oven.

Managing a Crowd

England's Police Know How To Quell Disorder Without Violence

Over in England as we have repeatedly pointed out the policeman carries no fire-arms, but only the policeman's baton. Yet when a great crowd of over a hundred thousand assembled in London, and there was disorder and some violence, it was reduced to order and not a shot was fired and not a man was killed. There were no machine-guns, there was no parade of revolvers, there were no sawed off shot-guns, and nobody's blood lay on any man's door. England can still show us something in the management of crowds and in the care of human life.—Halifax Chronicle.

Canadian Farm Poultry

The total value of all descriptions of farm poultry in Canada in 1932 is officially estimated at \$34,738,000 as compared with \$13,138,000 in the previous year.

Alberta's winter road clearance program now involves keeping 825 miles of main travelled highway open for traffic.

French Population Growing

Increasing Much Faster Than The British In Canada

The ever-growing French population of Canada is increasing more than twice as fast as the English, three times as fast as the Scottish, four times as fast as the Irish, so the Dominion statistician reports.

In the decade between the 1921 and 1931 census reports the population of the Dominion increased by 1,581,906 persons. Of these 475,247 were of French-Canadian origin, 108,061 of English, 172,725 of Scottish, and 123,000 of Irish descent.

In the last decade the British-origin population increased 10.52 per cent, but the French-Canadians increased 19.58 per cent. In the preceding 10 years the British increased 25 per cent, but failed to maintain that rate of increase. The French increase in the 1911-21 decade was about the same as the 1921-31 period.

The last census figures show the French to be 7 to 1 as compared with the British in the province of Quebec, while Ontario had a population of nearly 9 to 1 English and French. The French have the greatest total by a narrow margin over the English, there being 2,897,990 French-Canadians and 2,741,419 English-Canadians. Then come the Scottish with 1,346,350 and the Irish with 1,230,808. The Irish lead over the Scottish in New Brunswick and Ontario but the Catalonia folk exceed the Irish in all the other provinces.

Wins U.S. Science Prize

Young Canadian Awarded \$1,000 By American Chemical Society

Frank H. Spedding, Ph.D., a 30-year-old scientist, and a native of Hamilton, Ont., who has fashioned a new method of seeing into the invisible fine structure of solid matter, was awarded the youthful genius prize of \$1,000 by the American Chemical Society.

Dr. Spedding uses the light which can be reflected or otherwise, emitted by solids, such as rocks and minerals, to reveal what scientists call their "lattice" structure. This lattice is the spacing of atoms in the solid, including the spinning and other antics of these tiny particles. He reads the messages of these light beams after they have been passed through a spectroscopic, a glass prism which breaks them into the rainbow and records them as vertical lines on a photographic plate.

Restrictions Attached

U.S. Secretary of Treasury Barred From Working In Bank

When Ogden W. Mills retires from the office of Secretary of the Treasury he will be free to work wherever he pleases except in a bank that is a member of the Federal Reserve System. The system includes all national banks and most of the state banks that might like to seek the services of a former Secretary of the Treasury; the Federal Reserve Act of 1913 provides that the Secretary of the Treasury and the Comptroller of the Currency shall be ineligible during the time they are in office and for two years thereafter to hold any office, position or employment in any member bank. Appointive members of the Federal Reserve Board similarly are restricted unless they finish the term for which they are appointed.—Baltimore Sun.

Novel Plan Is Working

Philadelphia Women Raise \$1,500 Monthly To Feed Needy

"Hundreds of Philadelphia children are being fed by the contribution of a group of women who donate 1 cent a meal to the cause, it was disclosed the other day. Organized three months ago, the emergency food brigade has been functioning quickly and today its novel plan is providing \$1,500 a month for the needy. Each of the 1,150 members has a box into which the pennies are dropped at every meal. On the first of the month, they are collected by brigade officers.

Brussels Plans Exhibition

Twelve Nations Have Already Decided To Take Part

Commemorating the creation of the Belgian Congo fifty years ago and the opening of the first Belgian railroad from Brussels to Malines, Brussels has decided to have an international colonial and industrial exposition this year with Prince Leopold as honorary president.

Twelve nations already have decided to participate in the exhibition, which will cover 400 acres of ground. They are Brazil, Chile, China, Egypt, Ethiopia, France, Morocco, Peru, Spain, Switzerland, Czechoslovakia, and Tunisia.

Development of transportation, electricity and kindred subjects with the colonial section next in importance are the main departments.

Race Hard On Horses

Course At Aintree Where Grand National Is Run Is Most Difficult

The most difficult race for horses is the Grand National, over the famous steeplechase course at Aintree, England, near Liverpool. From 40 to 60 horses start in the event, which calls for four and one-half miles of running and jumping over the 30 barriers. Crowds ranging from 200,000 to 300,000 sit in the stands or walk along the racing strip. Few horses finish. In the decade from 1920 to 1930 only 73 of the 398 horses that faced the barrier reached the judges' stand.

Only Half Right

"You dear old Henpeck. I saw you sewing a button on your coat yesterday."

"That is not true."

"I saw you."

"That is not true."

"But I saw you with my own eyes."

"It is not true—it was my wife's coat."

It isn't what you do but how you do it. Page Picard did only 10 miles, but it was straight up.

Java is becoming air-minded.

CHAPTER VIII.—Continued.

"The Inconnu patrol blew up. There was nothing Haskell could do about capturing those bandits. He knew that if Williamson asked why no move had been made, the short-handedness at the post would be at least some excuse. Besides, one of the other detachments, over on Hudson's Bay or southeast in the Reindeer Lake country, would probably mail those bandits and the affair would blow over.

Those rainy imprisoning days, as he sat in his cabin and looked out along the slope for a mere glimpse of Elizabeth Spaulding, he was tortured by the question of why she was still here, and what stood between her and Baker. Why had Baker brought out in such hot haste and left this North country that was his home? Was Elizabeth waiting for him, or had she split up?

Sometimes it seemed to Haskell that his appointment to this northern post had not been a mere vagary of luck but a manifest act of destiny, that he might meet Elizabeth Spaulding. His triumph over Baker, his commission as a Mounted officer, his career in the Mounted—what did the whole of it weigh against the prospect of losing Elizabeth after he had found her? With the sincerity of the only passionate love in his life, he felt that if Baker married her and took her away, his victory over the ex-sergeant would be a grinning mockery.

Late one quiet evening, when Bill Hardcock was gone on patrol, Haskell saw Elizabeth go up the slope to the cabin which had been Baker's, and light the candles there, and after a quarter-hour come away again. Tripping down the grassy terrace to Mrs. Drummond's flower garden, she sat down alone by the edge of it.

He went out of his lonesome cabin and out along the twilight slope toward her. . . . Hat in hand, Haskell came up. With cold arctic eyes she surveyed him, amused at his humility. Toward her the man had no pride left. She reminded him sharply: "I bet I asked you not to talk with me again."

"Yes, you did," he said humbly. "I haven't forgotten. It's made these last couple weeks pretty miserable. But when I saw you over there tonight . . . Elizabeth, won't you let me—can't I stay just a little while? I got some news day before yesterday that cut me up pretty bad. . . . He waited for her to comment, but she said nothing. "You remember last winter I said my father was in poor health? I got a radiogram night before last about—about him."

Elizabeth understood that his father had died. She was quite well aware that Haskell was not exactly stricken by the news, though he was trying to play upon her sympathy.

She wondered why he was discussing the matter with her now.

As he went on talking of it, she began to see his reason. He mentioned the big country estate outside of Cobham, the town house in Ottawa, the

extensive and valuable timber limits on the Klamath. When he hinted at himself being the only heir and the owner of all this, she saw his whole drift.

The news left her entirely cold. From his treatment of Alan she knew how tricky and dishonorable he could be. . . . She smiled sarcastically at him, and being so crude about it. Probably he thought to make her his Ottawa mistress.

The affections of such a man were evanescent at best, and certainly quicksand to build upon. Imagining her relatives with this man if she ever allowed herself to become dependent on him, she saw him staving off marriage by the old threadbare dodges, and at last turning coldly away, when passion went. Alan Baker in time would go farther than Haskell and his Cobham estate. Alan was honest, he could be depended upon.

Angry and contemptuous she arose. "I've got to go. But there's something I really must thank you for, Inspector."

"To thank me for?" He too had risen; he was leaning toward her eagerly. "I'm glad . . . I didn't know I'd done—"

"You didn't intend it as a favor. But it was." With mocking irony in her tones she went on: "Last winter Alan was offered a very splendid position in Victoria. I wanted him to take it. You used to say he was a non-com with no prospects, and that was somewhat as I felt. He didn't want to leave. He wanted to stay in service and live here in the North. Just when he was wavering, you forced his hand. You made him buy out, and so you made our marriage possible. I'm awfully indebted to you, really. You didn't realize what a favor you were doing."

She left him standing there, staring after her, dazed and speechless.

That same evening, only an hour later, Haskell made a discovery so startling that in some measure it took his tortured thoughts away from Elizabeth.

A knock sounded on the door, and Whipple came in with a report. "Sir, last week I missed fifty gallons of gas and five of oil from our stores. I thought it might be a paper stolen by the question of why she was still here, and what stood between her and Baker. Why had Baker brought out in such hot haste and left this North country that was his home? Was Elizabeth waiting for him, or had she split up?"

"Well, what about it?" Haskell snapped.

"Nothing, sir; nothing at all," Whipple said hastily. He saw that his chief was in a vicious mood, and he backed out. "Just what you would like to know, sir. Most likely some half-breed with an outboard motor is stealing this, sir." And he closed the door quietly.

Alone again, unable to bear his stinging thoughts, Haskell turned in desperation to the terrace rocks set in an effort to distract himself. As he had done on evenings past, he picked up an Edmonton station. Among the orders, news and personal messages, he heard that an aviator named Featherfoot and another man, name unknown, had stolen a machine gun, propeller, pack-chest, field instruments and other things at Edmonton; and escaping in Featherfoot's monoplane, had last been sighted following the Alberta and Great Waterways railroad toward McMurray. The posts were warned to be on the lookout for the plane and to arrest the criminals on sight.

The name and description of Featherfoot meant nothing to Haskell, but the description of the other person made him thoughtful. Tall, rangy, sandy-haired, gray-eyed, with a long prominent nose across his left temple—that description would fit Alan Baker to a dot. And Baker had gone south and might conceivably have reached Edmonton.

Haskell pondered this possibility a minute and then dismissed it. It was Bill Hardcock who innocently opened his eyes to the truth.

Knocking, entering, standing before the desk, Bill requested: "Sir, if you don't mind, I've got three days free time coming to me, and if you don't mind I'd like to take them now. I'd like to have them in a row, if you don't mind."

"I'm short of men as it is," Haskell cut him off. "You can't go. That's that!"

It wasn't "that" for Bill. Refusing to be driven out, he planted himself there wide-legged and pleaded for his three days—pleaded till Haskell saw that the corporal must have some special and urgent reason for wanting off duty.

"Are you getting married?" he demanded sarcastically.

"No, sir," Bill answered, with more outward respect than he had ever shown before. "I—I want to go trout fishing."

Haskell angered. He started to order Bill out of the cabin on penalty of c. b. But then he suddenly checked himself, he half-rose from his chair, gasping, with a revelation dawning through his brain.

There it was—the whole crashing truth! Baker's strange haste to buy out, that plane coming north, the missing gasoline. Bill Hardcock's request for a leave of absence. . . . All these disjointed facts suddenly clicked together like the parts of a Chinese puzzle.

That man wanted in Edmonton had been Baker! He was coming back in a plane to get those bandits! Hardcock was stealing gas and oil for the

machine to maneuver on! He needed these three days of absence in order to take the fuel out to the rendezvous!

Wanting time to think, time to make the right move, Haskell said jerkily: "Just a—minute, corporal. I'll have to . . . I want to consider your request." And he turned away to the window.

So Baker had not given up! He was out of service, but he was coming back to finish with those bandits. Haskell's knowledge of Baker's grim persistent nature and the man's uncanny wisdom in a wilderness man-hunt, whispered to him: "And he'll corner them, too! He'll run those men down! He's going to have a show-down fight with them."

For a moment he was staggered by the man's superb daring. For a moment, forgetting personal scores between himself and Baker, he felt an admiration for this magnificent attempt.

Then, as he saw deeper into the consequences of this feat, his admiration darkened and flickered out. How would it look for the ex-sergeant to capture or kill those men, or at least corner them and go down fighting? What would the higher officials have to say about that?

"Are You Getting Married?" He Demanded Sarcastically.

All his hatred and jealousy of Baker flared up. Not only was this man going to marry the girl he loved, this relentless sergeant, rising out of a crushing defeat, was going to show him up and make his very name a joke throughout the Force.

"You are instructed—," he still heard those crackling words flashing up across the wilderness from Edmonton—"to capture that plane and to arrest those criminals on sight." Baker was a criminal, a wanted man, subject to arrest, creation of a penitentiary sentence! Somewhere to the south he was flying up across the latitude of the great rendezvous somewhere with Hardcock.

Hardcock could be trailed to that meeting place! The plane could be captured! Baker arrested, sent up for a term. . . .

(To Be Continued.)

Wheat and Empire Ports

Policy Regarding Imperial Preference Is Proving a Success

Canadian wheat is moving out faster this winter than at any time since 1929, following the big crop of 1928. And this year it is moving through Canadian ports. The figures so far to show that the policy of extending the Imperial preference virtually only to wheat which passes through Empire ports is proving successful.

Figures compiled by the Port of New York authority tell the tale clearly. In January only some 103,000 bushels of grain were received at New York, as against over a million bushels in 1922—less than a heavy year. At the same time the visible supply of Canadian and American grain in the port has declined 64 per cent.

This shrinkage is certainly not due to lower Canadian exports but to diversion of Canadian wheat through Canadian ports, notably Saint John and Vancouver. In January of this year Canada exported 16,500,000 bushels, the highest record for any January since 1929. December and February figures were proportionately high.

As long as our wheat moves at this rate, a strong prima-facie case is presented in support of those who insist that curtailing transshipment through the United States has not yet injured the Canadian wheat farmer.—Montreal Star.

Trinidad Becoming British

There was a time when it was part of Venezuela, another when it was inhabited by Caribs, another when it belonged to Spain, another when it virtually belonged to France, and another when it was rapidly becoming Americanized. Now, happily, it is becoming more British every day.

Trying Luck At Grain Show

Mrs. Mary E. Maycock, of Milford, Prince Edward County, Ontario, the only woman who has ever won three championships in succession at the Chicago International Grain Show, has entered samples of beans for the World's Grain Show in Regina.

Buildings erected in Oslo, Norway, last year were valued at double those constructed in 1931.

FAT GIRLS OUT OF FASHION

Women of All Nations Slimming

All over the world Kruschen Salts is appealing to girls and women who are striving for an attractive free-from-fat figure.

Here is the method they are following to banish fat and bring into blossom all the natural attractiveness that they possess; every morning they take a half-teaspoonful of Kruschen Salts in a glass of warm water before breakfast.

They do this every morning—without missing one—"It's the daily dose that takes off the fat." When Kruschen is taken daily, every particle of poisonous waste matter, all the natural attractiveness that they possess, every morning they take a half-teaspoonful of Kruschen Salts in a glass of warm water before breakfast.

At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood containing Nature's six life-giving salts is carried to every organ, gland, nerve and fibre of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity, and a charming figure.

Named Famous Old Mansion

Sir John A. Macdonald Suggested "Earscliffe" To Former Owner
Sir John A. Macdonald named "Earscliffe," his famous old home in Ottawa, 14 years before he took up residence there, his daughter, Hilda Mary Macdonald, who recently died in Hove, England, revealed in letters to friends.

Sir John A. suggested "Earscliffe" as a name to Thomas Reynolds in 1870 when he dropped in to tea as the Reynolds family was talking over the matter. They had decided on "Eagles Cliff," but when Sir John pointed out that "Ears" is Scotch for eagle, "Earscliffe" might be suitable, the family adopted his suggestion.

Fourteen years later the country's first premier bought the residence, spent the most memorable years of his career there, and looked his last on life through its broad windows.

Built in 1870 by Hon. Thomas McKay, who also erected Rideau Hall, residence of the Governor-General, which stands a short distance away, "Earscliffe" had several owners before the Conservative chieftain. A year or so ago it was bought by the British Government as the official residence of its high commissioner, and now is occupied by Sir William and Lady Clarke.

Bell Over Century Old

Cast In 1819 Is Now Used In Nova Scotia Church

Sydney's oldest church bell to have another chapter written into its interesting history. The bell, which sounded for years in the belfry of St. George's Anglican church, where Garrison English troops attended, now calls worshippers to service in Christ Church.

While its origin has been shrouded in the mists of more than a century, tradition has it that the bell once belonged to the house on board a privateer. When the ship fell into the hands of the British, it is supposed to have been taken to Sydney and installed in St. George's where its chiming rang out to the soldiers of the garrison until their withdrawal from Cape Breton.

When Rev. C. K. Whalley assumed charge of St. George's the bell was moved in 1920 to St. Cyprian's Mission at Whitney Pier. Some years ago, this church burned down and the bell, rescued from the flames, has since remained unused. Despite its age and inscription on the metal shows it was cast in 1819—its tone is still clear and vibrant as on the day it came out of the mold.

Everything All Right

A plump woman, about to step into her car in front of a Fifth Avenue store, dropped a handbag mirror which splintered mournfully on the ground. A look of superstitious terror came into the lady's face. This was observed by a small, sad, unemployed man who was slowly passing. "I don't mean a thing, lady," he said, and wandered on.

Germans War On Muskrats

Herr Adam Roth, chief trapper for the Bavarian Government, has just completed a war against muskrats in that part of Germany, during which thousands of the pests were slain by an invention which he perfected recently. Muskrats did great damage there, but now Bavaria has few, if any.

Prague, Czechoslovakia, Will Hold Its Thirteenth Agricultural Show In May

Wives get tired during these hard times. They are the ones who must bear the brunt of the family. When the husband comes home with less money in his coat pocket, it is to the wife who must struggle along and make the best of things.

If you are tired . . . worn out . . . discouraged . . . what you need is a tonic that will give you the strength to carry on.

98 out of every 100 women who report to us that they are benefited by this medicine. Buy a bottle from your drug store. Buy a bottle from your drug store.

HELP FOR TIRED WIVES

Take Lydia E. Pinkham's Vegetable Compound

Europe does not materially differ from the rest of the civilized world. The forces of evil there are not supreme. Its people striving to attain complete recovery from the terrible burdens inflicted upon them by the last war, will not readily be plunged into a new, and this time suicidal, conflict.

The gospel of chancelleries, the rivalry of high command may seem made for war, but the sober, intelligent, dominating common sense of the peoples will probably prevent their being rushed into another storm of rage and destruction over issues which concern them little, if at all.

Columbia's new highway construction program covers three years.

Takes His Dinner Guests

Richest Prince In World Gets Money In Many Ways

The richest prince in the world—the sultan of Hyderabad—writes *Aspirin* in *The Aids* *Prize* *Prize*. Vienna has devised a regular system for wringing as much money as possible from his subjects and his income from various little "specialties" must reach a considerable figure. This is in addition to his governmental allowance of about 8,000,000 rupees a year.

What, for instance, can one say of a prince who regularly exacts from each of his official dinner guests a name or gift that varies with the rank of the guest? The lowest sum is a gold mohur (a little more than two pounds)—no small expenditure for an officer or government official, especially since these strange tax-laden receptions sometimes take place more than once a year. As the number of guests averages 500 this is no mean source of income.

But the sultan has other less public but equally lucrative business practices. He chooses to "honor" his friends and acquaintances by sending them boxes or baskets filled with fruit or candy, always with a little gift attached on which is marked the name to be paid for the "gift."

The way in which these dainties are procured is not without interest. The sultan betakes himself to a bazaar, dressed in his usual somewhat negligent attire. He will enter a confectioner's shop, sample the wares and praise them whereupon the poor proprietor is obliged by the custom of the country to offer the Prince as a gift the goods he has praised.

Quick as a flash they disappear into the basket that the sultan has brought with him, only to be presented later, divided into small portions and prettily arranged to recipients who, of course, are delighted.

THE RHYMING OPTIMIST

By Alice Michalson

NONE CAN DOUBT

The world is so ahrim with ecstasy On any sun-sweet, wind-washed April day, Life's tides so strongly rising in each So surely pulsing through each robin's lay

That none can doubt the wisdom of the plan Which paints such beauty on a way-side flower, And through unnumbered springs since time began

Has not the countless birds song's lovely dower.

Oh, every tiny pattern that is traced Is with such infinite precision placed. So deftly tinted, so exceeding well, None can deny the utmost vast scheme must be.

As perfect as the little pattern seen!

Canadians Win King's Trophy

Boys Showed Highest Efficiency In Miniature Rifle Shooting

Canada has again won the King's trophy for miniature rifle shooting among the boys of the British Empire. Winnipeg and Calgary marksmen were among the outstanding Canadian competitors.

More than 41,000 boys competed for the trophy, which is awarded the country scoring the best efficiency in imperial shields competitions. Canada secured an average of 86 points, South Africa 82, Great Britain 72, New Zealand 68, and Australia and India failed to qualify.

Canada won 135 medals for individual scores and South Africa was next with 35. The Senior Imperial Challenge shield for small caliber units was won by Deal Kent cadets, with Athens, Ontario, high school, Canada, second.

The Earl Jellicoe award for large calibre scores was won by Hamilton Collegiate Cadets, with the Canmore Highlanders cadets of Winnipeg, second.

The Junior Imperial shield for small units was won by the Woodbridge, Ont., cadets, while the Earl Haig award for large units was won by Calgary Hurmest school, with the Quebec Commercial Academy second.

Canada entered 11,226 boys, South Africa 12,492, New Zealand 10,820, Great Britain 5,677. Thirty-eight Canadian units were in the honor list.

Using Their Common Sense

European Countries Not Likely To Rush Into War

An article by Willis J. Abbott in the Christian Science Monitor says: Europe does not materially differ from the rest of the civilized world. The forces of evil there are not supreme. Its people striving to attain complete recovery from the terrible burdens inflicted upon them by the last war, will not readily be plunged into a new, and this time suicidal, conflict.

The gospel of chancelleries, the rivalry of high command may seem made for war, but the sober, intelligent, dominating common sense of the peoples will probably prevent their being rushed into another storm of rage and destruction over issues which concern them little, if at all.

Strong On Pensions

The inhabitants of Stockley, England, boast that more than one-third of their number receive the old age pension. Of a population of 60, only 18 are children, while 25 are between 70 and 90.

The underground tuber of the "old man of the earth," a dainty plant, weighs from 10 to 15 pounds.

HEADACHE

Here's Quick Relief:

Aspirin brings you immediate relief. It acts before you can feel any effect at all from the slower forms of relief.

Do not hesitate to take Aspirin tablets because of this speed. Their quick action is due to the fact they dissolve immediately. They are perfectly safe. They do not depress the heart.

That's the beauty of a remedy like Aspirin: Anyone can take it, as often as there is any need of its comfort. In

sufficient quantity to get complete relief. You could take Aspirin every day in the year without ill effects.

When you want relief from headaches, colds, neuralgia, or neuritis, periodic pains, etc., stick to Aspirin. You know what it will do, and you know what you are taking.

The new reduced price on bottles of 100 tablets leaves no reason for experimenting with any substitute for relieving pain. Insist on Aspirin.

ASPIRIN has SPEED!

TRADE-MARK REG.

Another Cure Announced

Scientists Work Out Serum Treatment For Undulant Fever

Three research workers of the College of Medicine of the University of Cincinnati have announced the development of a serum that transforms the usually disabling undulant fever into something little more incapacitating than a slight, common cold.

Undulant fever—Malaria fever, as it is known in Europe—ranks second only to tuberculosis in economic importance in its effect on livestock as well as on man.

The serum was developed by Dr. Alfred E. O'Neill, Dr. W. B. Wherry and Dr. Lee Fosbury. Like many others who have worked with the disease, Dr. O'Neill fell ill of it, but recovered to resume his work.

Undulant fever gets its name because the temperature of the sufferer rises and falls in defined and regular curves. Fever, pain and disability continue, often for years. The new serum, the three researchers say, cures in from three to four days.

In their research the three Cincinnati scientists found customary methods wouldn't work; that vaccines made from the germs themselves were far too dangerous to inject into anyone. So they bubbled nitrous oxide gas through the liquid which nullified the poison, yet left the vaccine as effective as before.

The serum they make by injecting the vaccine into goats, drawing off blood and using the blood, that remains when the blood coagulates.

Testing New Drug

"Harmol" Believed To Be Cure For Heart Disease

A drug which may prove to be a long-sought-for means of relieving sufferers from heart disease was returned by Professor James Gunn, professor of pharmacology at Oxford University, at a meeting in London of the Pharmaceutical Society.

The name of the drug is "harmol," and the professor said that the drug was now being tested to see if its effects on human beings were the same as on the animals with which he had experimented.

He explained that in angina pectoris the arteries of the heart spasmodically contract, and this gave rise to intense pain and frequently led to heart failure.

Thus the finding of a drug which, as this one promised, would cause the heart to dilate and increase the flow of blood through it would be very important. He said he had been searching for 25 years for such a drug.

Little Helps For This Week

"I must work the works of Him that sent me while it is day, the night cometh when no man can work." — John 9:4.

He who interrupts the appointed task and duties of the day. Untunes full of the pleasure of the day.

Checking the finer spirits that refuse to flow, when purposes are lightly changed.

W. Wordsworth.

By putting off things beyond their proper times one duty treads upon the heels of another, and all duties are felt as irksome obligations, a yoke beneath which we fret and lose our peace. In most cases the consequences are that we have no time to do the work as it ought to be done. — F. W. Faber.

Sufficient for the day is the good thereof, equally as the evil. We do not do at once, and with our might, the merciful deed our hand findeth to do or it will never be done, for the hand will find other tasks and the arrears fall through. And we shall one day be charged as faithless and recreant before God. — J. H. Thom.

Were True Patriots

Two U. S. Citizens Intentionally Overpaid Income Tax Last Year

Two persons intentionally paid the State of New York greater sums in income taxes last year than the law required; one, a retired professor, waived his personal exemption from taxes on a part of his income, and the other, an executive in a transportation company, forebore to write off \$25,000 of losses sustained in sales of securities. Neither is named, but both are cited as fine examples of public spirit. These men deserve public gratitude. They acted as a

M.D. Crown will pay 5c. each for Magpie feet—old birds.

After the Holiday let us renew your logs by our modern process. Rainbow Cleaners.

A Mother's Day tea and sale of baking will be sponsored by the Women's Missionary Society, in the Church Hall, on Saturday, May 19th.

A meeting of the Central Alberta Football Association will be held at the Hospital, Ponoka, on Monday, May 1st, 1934 at 8 p.m. to discuss the organization of the above association.

Do not delay, put in a good supply of Mac's Best No. 1 patent flour. 95 lb. cotton sack \$1.45 W. J. Trott, Lacombe.

We are pleased to announce another Modern Achievement: a Cleaning Fluid approved by the Canadian Fire Underwriters Association. Rainbow Cleaners.

Alt. Harstad's Sale of Horses which was held at the Lacombe Exhibition Grounds Tuesday afternoon, was very successful. All the horses sold and at a fair price.

The public are invited to a meeting in the Church Hall, on Saturday, April 22nd, which will be addressed by Miss Hullett, District Nurse of

the Red Deer Health Unit. This meeting is held under the auspices of the Women's Institute.

Use your phone and call 54 for anything in paint and hardware. Ramsey and Marshall. The Service Hardware.

That Toronto girl who washed her hair in gasoline right alongside a lighted gas stove, says she did it on the advice of a friend as a means of curing dandruff. She got rid of the dandruff, all right, and is still in hospital.

Both services of the Baptist Church were well attended Sunday. Rev. Hargreaves gave a splendid talk to the Sunday School in the morning and preached a good sermon in the evening. At the close of the sermon four were baptised.

THE TEACHER'S PAY

Edmonton Bulletin
 A glance at the reports of the annual meeting of the Teacher's Alliance, and at the program of the annual convention for the Alberta Educational Association, shows that the teacher's pay is a live subject in both bodies.

There is nothing surprising in that to anyone who knows what has happened to salaries generally during the last three years. But it is significant, and the significance is not encouraging. That was not the subject with which these bodies were chiefly

concerned in former years and should ordinarily engage only a moderate amount of attention.

When teachers and others interested in education foregather they are expected to talk more about education than about what these engaged in "business" get or do not get out of it. And usually they do that. But who can blame them if that is the subject that presses strongly upon their attention at present? Or if they see in the crash of salaries the demoralisation of their profession and the ultimate lowering of the standard of the schools and the training these give to the children.

The fact is, education is, in measure, being sacrificed at the altar of our misguided adherence to a cast-iron monetary system, and the inevitable deflation that it has forced upon the country. Education, too, is being "deflated".

When the salaries of teachers go sharply downward, the quality of teachers and teaching will follow. There need be no doubt on that score. The hard-pressed taxpayer cannot help matters at the moment. He should at least realize that the root cause of the trouble lies in our national economic system, that it is preventable, and that it is the children who will in the long run suffer, from poorer teachers and poorer teaching if the standing and standards of the profession are permanently lowered.

General Housework wanted by competent maid. Apply Miss Lois Webster, Lacombe.

Most Sensible Relief Scheme

The government of the Province has just notified us that they have a scheme under way by which they hope to make many families now on relief self-supporting to a great degree. They want to get in touch with farmers who have vacant houses on their farms, and who are willing to let tenants work from 5 to 10 acres of land.

The Department is prepared to rent habitable buildings within a reasonable distance from railway, where there is access to water for house use, and if possible where fuel can be obtained locally, and within a reasonable distance from school. The government will pay a rental equal to the annual taxes on the quarter occupied, which will be paid quarterly while tenanted.

If you are interested, come in and see E. Walter Simpson, Secretary M.D. of Crown, and get all necessary information.

U.S. Goes Off Gold Standard

WASHINGTON, April 19.—The United States swung away from the gold standard today as President Roosevelt prepared to ask Congress tomorrow for new powers to effect a controlled inflation.

Withdrawal of gold support for the American dollar in foreign exchanges by the president was interpreted by his secretary of the treasury, William H. Woodin, as meaning suspension of the traditional gold standard basis of currency.

The immediate effect was an upward surge in stocks, and commodity prices, and a decline of bonds and of the dollar on world exchanges. In his first move, the president had put himself into a position to negotiate for a revised world gold standard by withdrawing support of the American dollar in foreign exchanges to combat the depreciated currencies of the foreign nations now off the standard.

The Senate of the United States on Thursday passed a bill which ten years ago would have caused international interest. This bill establishes a 5-day week and a 6-hour day in manufacturing industry in the country. It has now to go to the House of Representatives and then to the president, and the prediction is that the measure will eventually become law, modified, however, to the extent that the limit of labor will be fixed at 36 instead of 30 hours a week.

It is, of course, a drastic reform, the outcome of an emergency condition rather than a part of a considered national policy. Nevertheless it is an experiment of importance, and if it eventually becomes law it will no doubt remain so. It is, of course, part of the "cure" for depression which organized labor on this continent has been calling for since Samuel Gompers was in his hey-day.

If those who are employed do not have their wages reduced with the compulsory reduction of hours, the proposed measure will do good. It will mean that 25 per cent. more workers will be absorbed into industry. But if wages are cut it will have no effect in lifting the present state of deflation. Total wages and incomes will still be the same, and the level is now disastrously low.

A plan to increase the purchasing power of the public is the obvious need to end the present breakdown. Yet the United States experiment can be welcomed for what it really is—the first attempt to treat unemployment on the assumption that employment may never, even at the height of prosperity, be as great as it was. That is one of the problems of the world today—not to cure unemployment, but to treat it. The day of universal leisure is at hand, if only mankind will seize the opportunity held out.

PATSY O'BRIEN — Who will meet "Lefty" Boshko in the Big Tournament here on the 28th.

THE DOUGLAS SYSTEM EXPLAINED

The Church Hall was filled to capacity on Tuesday afternoon to listen to Rev. Everhard's elucidation of the Douglas System of Finance, which it is thought will do away with depressions and speed up the circulation of money. The Douglas System appears to the reporter to be a mixture of Technocracy and the Dole System, and the only thing wrong with it is that it will take a whole lot of education to make the ordinary individual endorse it. Under the outlined system the state will control all money and the people will not be allowed to hoard their money, as we all are doing at the present time. If you are interested in this system of

finance, Mr. Douglas has published a pamphlet setting out the strong points and you may secure one by writing to Mr. Everhard. No newspaper can enlighten you on the subject—too complicated for the Editor.

You will have a good time if you attend the dance in the Adelphi Hotel on Friday evening. This dance is under the auspices of the Lacombe Badminton Club. Music is being supplied by Bob Paulsen's 6-piece dance band. This band which was recently re-organized is rapidly becoming popular and have been well received wherever they have played. Dancers are assured of the very best music played in the most modern way.

Remember the Dance in the Adelphi Hotel on Friday evening (tomorrow), under the auspices of the Badminton Club. Music will be provided by Bob Paulsen's 6-piece band.

Among the "Don'ts" for M.P.'s we read: "They are not allowed to sleep in their seats, and they are to be checked by the Speaker, if they attempt to read a book in the house itself." In the interests of good government, we would like to see someone declare the order ultra vires. A sleeping M.P. is at any rate doing no harm.

If The World's Entire Supply Of Gold Was Assembled It Would Occupy But Small Space

All this talk of gold—the gold standard, the lure of gold, the hoarding of it—drove professors at New York University into a corner the other day, and when they came out they revealed that if the world's entire supply were brought together it could be tucked away into a couple of four-story brownstone fronts.

By some fancy figuring, says the New York "World-Telegram," they found that since Columbus came to America there has been produced in the world 1,100,000,000 ounces of pure gold, worth in United States coinage approximately \$22,000,000,000. This, they said, is the equivalent of about 83,526 cubic feet of gold and would make a cube 39 feet 11 inches on each side.

They then showed what has become of it. In gold coin and bullion throughout the world there are 580,000,000 ounces, worth \$12,000,000,000. This occupies 33,144 cubic feet, and would make a cube 32 feet 4 inches on each side.

Included in this, of course, is the United States' supply, worth \$4,045,000,000 and occupying 11,127 cubic feet. It would make a cube about 22 feet on each side.

About 150,000 ounces of gold are estimated to be hoarded in India and the Orient. It is worth \$3,000,000,000 and is equivalent to 8,286 cubic feet, making a cube 20 feet 3 inches on each side. The East hoarded much more than this three years ago, but high prices have brought some of it out of hiding places in India.

"It is impossible to make any exact estimate of the gold in use in the form of jewelry, spectacle frames and gold teeth, but still theoretically available," the professors pointed out. "Probably 150,000,000 ounces is a reasonable figure. This would be worth about \$3,000,000,000 and would equal 8,286 cubic feet and would make a cube 20 feet 3 inches on each side, the same as the gold estimated to be hoarded in the East."

Out of the total gold known to have been mined since the discovery of America this leaves about 220,000,000 ounces unaccounted for. It is worth \$4,500,000,000, equivalent to 12,429 cubic feet, making a cube 23 feet 2 inches on each side. It has been lost or razed up.

Before Columbus' time the world's gold stock probably did not exceed \$1,000,000,000.

As to gold reserves still in the mine, it is agreed, the professors said, that they are diminishing so rapidly that either new supplies must be discovered or new methods of extraction devised if the output is to keep up. A rough estimate of minable gold known to be in mines, is not even 400,000,000 ounces worth \$8,000,000,000, equivalent to 22,925 cubic feet and making a cube 28 feet 5 inches on each side.

Much larger amounts of gold are known to be present in low grade ores, not profitable to work under present methods.

But by far the greatest amount of gold of which science has any certain knowledge is the supply in the water of the seven seas.

"Quantitative estimates are very uncertain because the gold content of sea water varies from place to place in the ocean and has not been surveyed accurately," the professors said.

"A minimum estimate, based on the best available data and assuming about two-tenths of a grain of gold in a ton of sea water, indicates that the total gold in the ocean is at least 50,000,000,000,000 ounces, or about 50,000 times as much as has been mined since Columbus discovered America. This would be worth \$1,000,000,000,000. It would equal 287,000,000 cubic feet and would make a cube 729 feet on each side."

It would if they could get it out, but despite the chemists' repeated efforts to extract oceanic gold by cheap processes, they don't know how.

Editor Is Handless

Writes Copy For Crisp's Paper With His Feet

"Our Struggle," organ of the crippled of Czechoslovakia, is now edited by Frantiek Filip, a young man who is the only editor in the world who writes his copy with his feet.

Filip, who has no hands, is a graduate of the Prague Rakule School. He is not only able to write with his feet, but also can run an automobile, a typewriter and other machines.

Makes Answer Sure

The flashing of SOS of a ship in distress need never go unanswered because of a sleepy wireless operator. New York engineers have designed a receiver that not only records an SOS, but rings a gong in the operator's quarters and flashes on a special light on the ship's bridge. The gong rings as long as the distress signal is coming through the air, or until the operator responds to the call.

The Hungarian partridge feeds to a very large extent on weed seeds.

Fast Readers Are Best

Test Shows They Remember More Of What They Read

Fast readers are better readers than slow ones, an educational survey has shown.

Evidence supporting this contradiction of common belief was reported at the University of California by Dr. John A. Hockett, assistant professor of education, after a series of tests with his students.

The fastest readers remember more of what they have read than slow readers, Dr. Hockett found. He asked 20 questions of his students, based on text they had read in two minutes.

The group of students that read fastest answered an average of 12.7 questions correctly, the middle third answering 11.3 questions correctly and the slowest reading third answered only 10.4 correctly.

The group tested by Dr. Hockett was composed mostly of graduate students in education. The students read at speeds varying from 510 to 220 words a minute, with the average rate 265 words a minute. The text dealt with educational problems.

A group of teachers in an Oakland elementary school, given the same test, read at an average rate of 263 words a minute, with individual maximum and minimum of 355 and 360 words a minute.

By Ruth Rogers

DELIGHTFULLY SMART AND CHILDISH

Easy to make, easy to launder. Today's fascinating pattern is a versatile one. It does for frocks in dainty materials and also for those of sturdier character.

Now a red and white dainty with plain white inspired the first model. Its darling bow frills were pieced.

You can imagine it also lovely in sailor-blue linen with white organdie. Should sturdy cotton be your choice, you've then to omit the frills. You may then bind your edges. For instance a pink and white pique collar. Use the candy stripe on the least 50,000,000,000,000 ounces, or about 50,000 times as much as has been mined since Columbus discovered America. This would be worth \$1,000,000,000,000. It would equal 287,000,000 cubic feet and would make a cube 729 feet on each side."

It would if they could get it out, but despite the chemists' repeated efforts to extract oceanic gold by cheap processes, they don't know how.

Largest Telescope In Britain

Building At Greenwich Near Ready To House Big Instrument

A new 36-inch telescope largest in England, will soon be installed at Greenwich Observatory. The building which will house the instrument is now ready and the telescope itself is erected in a temporary alate at the works of the Newcastle firm which is making it. It will not be ready for use for some months. Although much smaller than the instrument at the Mount Wilson Observatory in the United States, it is probably the largest to be erected in the British Isles. The climatic conditions are not sufficiently good to justify the expense of building a large one.

Mrs. Rebecca Underwood has lived in the same house in Brighton, England, for 90 years.

Coming Of The Birds

People Who Do Not Welcome Them Are Strange Indeed

Just as the first flower that peeks its head above the snow gains an added beauty—a beauty that is not really its—so the voices of the birds heard while the winter is making ready to go and there is the feeling of spring a-coming are the most welcome and delightful sounds that greet the ear.

Birds that are strange to us just at this time of year. No ear can be calmer to the sound of their sweet twitterings, and no eye blind to their beauty. There must be something wrong in the heart of the individual who does not respond to the sound of a bird and feel that indescribable joy that comes, like some invisible electric current, to cause the pulse of life to beat within us. In there not even something magical in hearing the twittering of the snowbirds in the silences of the winter night?

If the voices of the birds are still there will be much that will go out from the joy of human life. These singers tell of the joy of life they feel within them. They tell of happiness and content—pleasing notes in a world that they live their lives happily in themselves, without the strange strivings and the vain imaginings of man.

We should all be bird lovers. It should be a part of the education of the young to make them love and respect birds, for, otherwise, they can easily fall to the instruments of their destruction. Let not curiosity impel them to try to snare or stone birds merely for their curious possession. This will be something worth while to the young.

Those birds who come to us just now are an ever-pleasing source of delight to those who have learned to appreciate them. To them when they visit us it should be a place of sanctuary—not an official sanctuary, but one where they may find rest and the surrounding communities. That they can come to no harm through any wanton mischief or the lust to kill—Senator Buchanan in the Lethbridge Herald.

White and Brown Eggs

Science Cannot Tell Why Color Of Shells Differ

The color of an egg shell is no guide to the quality of its contents. Furthermore, science has not yet revealed why nature has given the power to some breeds of poultry to color egg shells brown, while in others the nature, while calcium is retained. A partial explanation is that the majority of the poultry left on the farms of Canada divide naturally into two groups.

One group, comprising a number of breeds, makes up the bulk of the poultry breeding activities in ancient times in the countries bordering the Mediterranean. They bear the names of these sections of Italy and Spain, from which they sprang, Leghorns, Andalusians and Minorcas. The hens of these breeds lay white eggs.

The breeds making up the other group have their origin in the early days of North American agriculture, when the pioneer poultry breeder of this continent, working with miscellaneous imported stock, developed their own distinctive breeds. They, too, bear names indicative of their origin—Plymouth Rocks, Rhode Island Reds, Wyandottes. The hens of these breeds lay brown shelled eggs. In addition to these major groups, says Mr. T. A. Benson, Dominion Live Stock Branch, there are some breeds of English origin to be found on Canadian farms, the most common being Orpingtons and Dorkings. These two breeds typify nicely the traditional spirit of fair play. The Dorkings lay eggs with white shells, while the eggs of the Orpingtons are brown.

Deplores Attitude Of Despair

Youth Of Land Should Look Forward To Something Constructive

Victoria Sackville-West, celebrated English writer, does not pretend to like the present-day literature of despair. "I think it is having a deplorable effect on the young," she told members of the Women's Canadian Club at Montreal. "It is high time the young stopped looking along those paths and looked forward to something constructive and not merely destructive, something positive and not mere negation. One does see signs of its stopping," she said. The present tendency in literature she believed to be the last wave of reaction to Victorianism, a dying effort to get rid of illusions and sentimentalities.

Followed Instructions

Mrs. Mannerley to her little daughter, who has just returned from tea with friends: "I hope you said, 'No, thank you, often than Yes, thank you.'"

Mabel: "Yes, I did. I hadn't been eating more'n half an hour before they began saying, 'Don't you think you've eaten enough? Aren't you afraid you'll make yourself ill?' And I said: 'No, thank you, every time.'"

Manila, P.I., may create the office of public defender.

Keel-grass is a flowering plant belonging to the pond-weed family.

M. CHALIAPIN KATS HIS "HAT"

This is not a gramophone record-eating competition but Feodor Chaliapin testing the gold gramophone record presented to him to commemorate his uninterrupted association for over thirty years with a famous British gramophone company. The gold record is a replica of the record of "The Volga Boatmen," which has been the best seller of any of the famous Russian bass's records.

Britain Always Ready To Make Sacrifices

But Other Nations Are Not So Ready

Some weeks ago Great Britain declared an embargo on the shipment of arms to Japan and China. When the government made this announcement it expressed the hope that other nations would fall in line, and that the war in the Far East might thus be, to some extent, limited. No other nations have seen fit to join in the prohibition. As often in the past, the Mother Country set a good example and nobody followed it. She therefore, lifted the embargo.

So it was in the case of free trade. Nearly three generations ago England abandoned protection in the hope that other countries would follow suit and that tariff barriers would be abolished all over the globe. The expected development did not occur. As a matter of fact, tariffs were everywhere raised higher and higher. This movement was accentuated after the war, until the British Isles remained fiscally unarmored in a fiscally armed world. The end of "the experiment" came a few months ago when the British elections, faced by disaster, voted for the adoption of the protectionist system and a new Parliament at Westminster put the policy thus adumbrated into force.

So it has been in the case of war debts. She has repeatedly offered to forgive others twice as much as she asked others to forgive her, but all to no avail. So it has been in the case of disarmament. The British have reduced their defence forces from land, at sea, and in the air far below the requirements of a world-wide Empire, and of a homeland which depends upon safe sea routes for its very food supplies. Great Britain has given this pacific lead at great risk to her own people. Some of the other nations have not done their part.

The British Government has confessed that it cannot go on disarming unless other countries play the game. Recently Premier Ramsay MacDonald and Sir John were at Geneva battling against what appears to be an imminent failure of the World Disarmament Conference—Toronto Mail and Empire.

Chose Lesser Evil

Hospital Nurse—You say financial difficulties brought you here? Patient—Yes. I saw my tailor coming, crossed the road to avoid him, and half way across I saw another creditor on the other side—I did not know what to do—I hesitated and went under a car.

Wheat exports from Vancouver for the current crop year to date now total 68,750,202 bushels, and it is expected the record movement of 98,407,519 bushels established during the 1928-29 season will be exceeded.

A rayon plant large enough to supply the demands of the country is planned in China.

Time Given In Hours and Minutes By Numerals

A new type of electric clock eliminates dial and hands and substitutes large numerals visible through small windows in the front plate. Time is read directly in hours and minutes (thus, 8.05 for five minutes after eight), and the second hand is replaced by a rotating dial indicating seconds. The numerals are illuminated by a small lamp which provides sufficient light to read the figures in the dark. The new clock, which is known as the cyclometer clock, is built like the device that records automobile mileage.

It may become a little difficult for the older people, so long used to seeing two hands revolving in front of a circle of numbers, to take up the new clocks. But they should be quite popular with the young.—St. Thomas Times-Journal.

Sir Arthur Currie Deplores The Spirit Of Despair And Failure Which Has Seized Many People

Artist Carves "Fairy Tree"

Children In Melbourne, Australia, Go In Hundreds To See It

A wonderworld of elves, gnomes, sprites, birds and animals has appeared in the Fitzroy Gardens, Melbourne, on the guarded red gum tree. Children go in hundreds to see it.

The magic wand which summoned this strange land into the shady gardens was the sharp carving instruments of Miss Ola Cohn, the sculptor, whose art the "Fairy Tree" is likely to express for many years to come.

Miss Cohn, who is an Associate of the Royal College of Art, London, returned to Melbourne last year after five years of study in England and on the Continent. She got the idea of a "Fairy Tree" from one she saw in London, and after a little native bush, carries a tiny fairy bear on her back; a joyous elf rides on the back of a genial old dog, waving a rush in his hand to protect himself against a snake which is creeping slyly out of a knot-hole. A kangaroo interestingly watches a conversation between two elves and an emu inquisitively screws his head round to see what is going on. Just below the outspread wing of a huge eagle, a sedate old kookaburra looks down on his laughing mate. A lizard or two creep here and there, and a spider presides at the centre of a great web which he has spread across the tree.

Miss Cohn has cleverly utilized the natural shape of the wood. Some of the figures have been evolved with a surprisingly small amount of carving. Her work has now progressed so far up the trunk that she has to stand on a ladder to reach the higher figures.

It is a busy old tree trunk, although it has been devoid of sap for many years. Up near the top, among the clustering ivy, a hive of bees—real ones—has made its home in a hollow; their droning song keeps Miss Cohn company as she works.

Does Not Require Magic

Art Of Making Good Coffee Is Very Simple

There is no magic attached to brewing good coffee. It is, indeed a very simple matter. These are the basic rules:

Don't guess the quantity of coffee and water. Always measure. One cannot be dogmatic about the amount, but the best result depends on individual taste. But once you have established the ratio of coffee and water that produces the kind of coffee you like best, be sure to measure both. Don't guess.

The coffee should never be steeped in hot water longer than eight minutes. The longer the infusion the more bitter the coffee and the less perfect its flavor and aroma.

The beverage should be filtered immediately from the grounds and the coffee served hot and quickly after making in order to retain maximum flavor and aroma.

Keep coffee-making utensils scrupulously clean, washing them occasionally with a solution of hot water, washing soda and ammonia.

Special Stamp Issue

Ask For Special Series Of Stamps For World's Grain Show

Issuance of a special series of stamps to commemorate the world's grain exhibition and conference in Regina will be proposed shortly to the postmaster-general.

Sometime ago a proposal for a special issue was placed before Hon. Arthur Baue and was turned down. It was held that the cost of the special issue would be too high to be justified at present.

Sponsors of the proposal are preparing another appeal to Mr. Baue. Special despatches from Ottawa indicate that the postmaster-general must make the final decision in the matter.

Synthetic Building Stone

Can Be Supplied At Low Cost From Dust and Chips

A new synthetic building stone which can be made at low cost from the vast supplies of dust and chips in American limestone, granite, marble and slate quarries, was announced to the American Chemical Society by Purdue University chemical engineers.

This man-made stone is described as several times stronger than standard building brick. It goes nature one better on color, since any shade desired by the manufacturer's fancy can be incorporated permanently.

Try It On Business

The average man changes his position once every seventeen minutes during his life, says Dr. Donald Laid, eminent psychologist. A similar rate of turning over might help slumbering business.

Bulgarian Is Strong

The strongest man in the world is believed to be Ilea Cubanoff, a Bulgarian, who has announced his intention of competing in a weight-lifting championship at Vienna. Cubanoff is commonly reported to have lifted with leather straps a motor car containing four passengers, and weighing a ton and a half.

Financial Responsibility For Drivers Of Motor Cars In Saskatchewan

Financial responsibility for owners and drivers of motor cars is now in effect in Saskatchewan, under the new law passed in the Saskatchewan legislature. The law comes into force on May 1, 1938.

For persons failing to pay under a judgment rendered against them on account of death or injury, or property damage over \$100, occasioned by a motor vehicle, the penalty is suspension of driver's license.

The suspension of driver's license will remain in force, in such cases, until the judgment is satisfied to the extent of \$5,000 for death or injury of one person, or \$10,000 for more than one person injured or killed in one accident, or \$1,000 for property damage.

Any person held liable under this law must also furnish proof in future as outlined or else be prohibited at all times of financial responsibility from driving.

Thursday April 27th "Ben Hur" in sound will show at the Bentley Community Hall. This is a big picture and was a huge success in silent, it is acclaimed to be much better in sound. Evening showing at 8:30 p.m. Admission, Adults 35c.; Children 25c. including tax. There will be a special matinee at 4 p.m., admission, Adults 25c.; Children 15c. including tax.

GOING IN FOR WHEAT

Newfoundland evidently plans to break into the wheat producing business on an extensive scale. The Newfoundlanders are a courageous and venturesome people. That is the result of their age long battle to win a living from the stormy sea and a climate not well suited to agriculture. They are embarking on an enterprise whose perils and discouragements are only too well known in regions better adapted to the wheat plant.

Growers in some other countries would tell Newfoundlanders they had

Sir Thomas Horder, distinguished Physician of London, England, has stated:—

"The willing and happy worker will get more work done and do it better than the unwilling and discontented worker. It is in this direction that alcoholic beverages like beer make their contribution to economic efficiency.

"Appetite is a function of the brain as much or even more than of the stomach, and its importance in the physiology of digestion and nutrition is very great. It is stimulated by a moderate use of such a beverage as beer, and at the same time zest is given to life, which results in larger and richer activities."

better stay out of the experiment, that they may be better off if it fails than if it succeeds. In the latter they may find themselves with a crop the world does not want.

In any case, the people of the older Dominion are making no mistake in collecting their seed. They are importing it from Peace River, a carload of it going forward at once. Better wheat is not grown anywhere in the world. If the Newfoundlanders find they cannot grow good Marquis and Reward wheat from Peace River that will be the fault of local conditions, not of the quality of the seed sown.

ARBOR DAY TO BE CELEBRATED MAY 1st

On Monday, May 1, Alberta will celebrate Arbor Day, according to Premier J. E. Brownlee. This is the annual day upon which forestry is honored and trees are planted in honor of the occasion. Government buildings and offices will be closed for the day.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver

—No Calomel needed

When you feel blue, depressed, sour on the world, that's your liver which isn't pointing its daily two pounds of liquid bile into your bowels. Digestion and elimination are being slowed on, food is accumulating and decaying inside you and making you feel wretched.

More hard-moves like salts, oil, mineral water, laxative candy or chewing gum, or purgatives don't go far enough.

You need a liver stimulant. Carter's Little Liver Pills is the best one. Safe. Purity guaranteed. Sure. Ask for them by name. Refuse substitutes. 50c. at all druggists.
